

## KEEL AUTO-INFLATION KIT

**ZODIAC P/N Z66034**

**Rev 0 – 14 Jan 05**  
**TECHNICAL DATA SHEET**

The keel auto-inflation kit allows automatic inflation of the keel, by connecting it to the main buoyancy tube on one side and to the keel valve base on the other, (as shown in the picture above). Once inflated, the inflation hose will be disconnected (rapid quick disconnect, keel side), so as to isolate both compartments from each other and eliminate trip hazards. This kit comes with a spare valve base, so as to retrofit and up-grade older boats which are not yet equipped with this system.

A valve base with its valve cover, situated on the bow of the Main Buoyancy Tube is standard equipment on all Futura Commando boats.

The kit comes with an installation procedure and can also be connected to one of the two bow I/C valves, as an alternative.
