

CARGO FENDER

INFLATABLE HEAVY DUTY CARGO FENDER

Zodiac Milpro™ cargo fenders are tough, yet light enough for one man to handle and position. Two sizes are available to cover most vessels berthing requirements.

They are constructed from Duratane™ CSM/neoprene fabric to withstand hard usage and to give maximum life.

Inflation is through a large diameter valve. The lightweight and small packed size make these fenders a must on all vessels with limited stowage and small crews.

The galvanized/stainless steel swivels and fender are designed to withstand an end pull in excess of 2 tons.

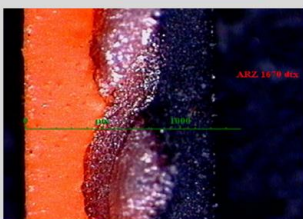

SPÉCIFICATIONS

	Medium		Large	
Diameter :	61 cm	2' 0"	61 cm	2' 0"
Length :	107 cm	3' 6"	213 cm	6' 12"
Weight :	14 kg	31 lb	22 kg	49 lb
Valve :	Leaffield C7 inflation/deflation			
Fabric :	DURATANE™ 1670 dtx CSM/Néoprène			
Reinforcement :	DURATANE™ 1100 dtx CSM/Néoprène strips			
Ring :	Reinforced heavy duty Galvanized or Stainless steel ring			
Colour :	Black

DURATANE™ fabric is made with specific thickness of CSM (ex-Hypalon) on the external layer, a core of polyester fabric and an internal layer of neoprene rubber.

The exterior side of the fabric is made only with CSM and this high thickness gives a far better resistance than other standard fabric for the same density (1670 dtx, 1100 dtx).
