- Maintenance free

Milpro AIR LIGHT

Milpro AIR seat

The Milpro AIR & AIR DUO seats have been developed by Zodiac Milpro to meet the high requirement of military and professional users. They are customizable and adaptable.

Their design provides the capacity to stay at sea during long range or high speed operations and preserve the crew from fatigue and injuries. The special structure of the seat makes it efficient in all sea conditions and adaptable on every boat.

The saddle is made of highly resistant and waterproof fabrics. One part with optimized grip for seating position and the forward part with a smoother texture to facilitate a stand-up ride.

Fully customizable, the Milpro AIR seats integrate a storage locker and a large choice of options as foot rest, deck track quick release, front handle, and moreover.

Fitted with its additional aft seat, the Milpro AIR DUO seat allows to carry an extra passenger on a foldable seat with an independent suspension system.

The AIR LIGHT version, without storage volume, allow to optimize weight when the amount of seats become important.

Milpro AIR DUO seat

← Sustainable damping

← Compatible with deck track modularity
