

# INFLATABLE FENDER

## INFLATABLE HEAVY DUTY FENDER

Zodiac Milpro™ Inflatable fenders are designed for use on yachts, motoryachts and superyachts and will provide protection when used under the world's most demanding conditions.

The small deflated size permits locker stowage, yet the large diameter valve ensures easy inflation in minutes for maximum safety and protection.

Zodiac Milpro™ Inflatable fenders are tough but light enough for one person to handle and position quickly.

DURATANE™ fabric is made with specific thickness of CSM (Hypalon) on the external layer, a core of polyester fabric and an internal layer of neoprene rubber.

The exterior side of the fabric is made only with CSM and this high thickness gives a far better resistance than other standard fabric for the same density (1670 dtx, 1100 dtx).
