SEARCH & RESCUE

The Zodiac Emergency Rescue Boat (ERB) range has been specifically designed to meet the demanding requirements of the search and rescue organizations throughout the world.

Our rescue track is a robust inflatable platform with anti slip surface designed for rapid deployment over the harshest of terrain including mud, ice, shallow water, unstable ground; sand and marsh. complete with integral sponsons providing stability on water, as well as preventing the track sinking into soft ground.

Light and portable, the inflatable platform enables rescuers to gain access to casualties safely and efficiently. Can be connected together for extended reach.

Available in 5 and 10 metre lengths.
