

AIRDROP - HELIDROP

UNOBTRUSIVE OPERATIONS

ANY BOAT - ANYWHERE - ANY TIME

Zodiac Milpro AIRDROP and HELIDROP solutions are developed to meet the specific military requirements of SpecOps deployment. Its specific features provide the capacity to military users to deliver rapidly their inflatable boat or RIB around the world, during night/day operations.

From low to high altitude, Zodiac Milpro is mastering these techniques to allow boats to be dropped from tactical helicopters or transport aircraft, and makes them fully operational after reaching the water.

Zodiac Milpro experience in this field, provides capacity to train any military forces and supply associated equipment to drop boats with sizes from 3,80 m (12,5 ft) to 11,5 m (38 ft) and weight from 50 kg (110 lb) to 8 000 kg (17 000 lb).

(A) Included with bare boat ; (B) To order separately

AIRDROP

HELIDROP

The Zodiac Milpro AIRDROP and HELIDROP solutions are developed to deploy rapidly inflatable boats or RIBs from any tactical helicopter or transport aircraft,

Directly drop with the specific Zodiac Milpro drop packing for the lowest altitudes or using parachute for medium and high altitudes, it ensures the operational state of the boat.

These Zodiac Milpro techniques can also be used complementary to UNDERWATER CACHE, allowing hiding the boat after the drop.

The Zodiac Milpro operational training team course ensures the best knowledge to use efficiently AIRDROP and HELIDROP systems.

Many other specific procedures are also available as helicopter boat recovery or special tactical infiltration.

AIRDROP - HELIDROP
